

The **HIVE** program provides comprehensive preconception counseling, prenatal care and perinatal care for women and their families.

The **Infectious Diseases Clinic** provides outpatient care for a variety of fungal, bacterial and viral infections, including Zika.

The **Latino Clinic** provides services for Spanish-speaking patients, including HIV primary care, mental health, social support, and health education.

Substance Use services are available for patients who struggle with addiction and other substance use disorders.

The **Women's HIV Clinic** provides food, transportation, social support and specialty care to HIV-infected women, who make up 25 percent of Americans living with HIV.

The **Young Adult Clinic** offers a comfortable setting for care, social opportunities and facilitated group discussions for HIV-infected young adults.

“We aim to deliver world class care to all patients, through all of life's stages and with the latest treatment advances.”

Diane Havlir, MD, Chief, UCSF Division of HIV, Infectious Diseases and Global Medicine at ZSFG

Research Opportunities to Improve Care

The world class care provided at the HIV Clinic at Ward 86 is often driven by the research of its providers, all UCSF faculty. Ongoing research topics include new treatments for HIV, including simplified regimens and long-acting injectable antiretroviral formulations; acute HIV detection and treatment; Hepatitis C and B treatments; novel treatments for addiction, infections or inflammation related to chronic HIV; complications related to aging and HIV; and new approaches to improve and measure adherence to medical regimens. If interested in partnering for research, please email hividgm@ucsf.edu.

UCSF's HIV Clinic at Ward 86 at ZSFG is a proud partner of the San Francisco Department of Public Health. Funding comes from the City and County of San Francisco and the Ryan White Care Act with additional support from the San Francisco General Hospital Foundation and private donations.

Ward86

A Call to Action

As the world's first HIV outpatient clinic, UCSF's HIV Clinic at Ward 86 at Zuckerberg San Francisco General Hospital (ZSFG) was founded to fight a fatal, indiscriminate disease that no one understood. Today, Ward 86 is a global leader in HIV and infectious diseases (ID) care. The practice of "the San Francisco Model" of care—an approach that was developed at Ward 86 and encourages integration and collaboration—has yielded innovations in HIV and ID care, and continues to build our understanding of disease and empower patients to thrive.

BY THE NUMBERS*

Each year, Ward 86 provides...

28,000

patient visits to 2,600 patients

6,500

screenings for sexually transmitted diseases (STDs)

2,000

social work visits

A Comprehensive Approach

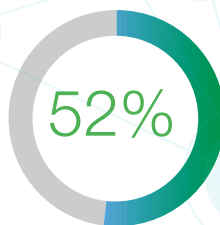

The mission of the HIV Clinic at Ward 86 is to care for all people affected by HIV and other infectious diseases, especially the vulnerable. To do so, they use a comprehensive medical model that involves more than primary and specialty care—including social services and case management—treating not only the disease, but the person.

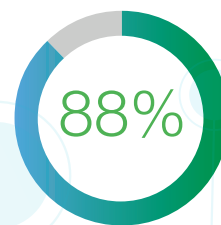

"Our mission is to take care of people who need help. At Ward 86, we offer more than medicine, we offer dignified care."

Mary-Lawrence Hicks, NP,
Deputy Clinic Director

TREATING A DIVERSE GROUP

of patients are racial/ethnic minorities

of patients are virally suppressed

Average patient age is
50
years

An Expanding Landscape

Through the years, the HIV Clinic at Ward 86 has developed and adapted to medical innovations and changing patient needs. Today, they offer a wide range of services, each filling a critical and unique need.

Golden Compass offers comprehensive care (including cardiology services) to HIV patients over 50 years, who comprise more than half of HIV-positive patients in San Francisco.

Pre-Exposure Prophylaxis (PrEP) Clinic provides a daily pill that can reduce risk of HIV infection for at-risk individuals by up to 95 percent.

RAPID starts patients on ART the same day they receive an HIV diagnosis, a process that used to take weeks.

The **Family Service Network** provides family-centered care to HIV-infected women of color, children and youth and their affected families.

The **Hepatitis C Clinic** offers curative treatment for Hepatitis C Virus, a leading cause of illness and death in HIV infection.

The **HIV Chest/Pulmonology Clinic** offers care for HIV patients with respiratory illnesses such as allergies, asthma, emphysema and lung cancer.

The **HIV Dermatology Clinic** provides care and treatment for a variety of skin conditions.
