Page 5. Rooming, PPE, and Post-Discharge Room Holds for Outpatient Visits

SF Health Network: Assessing Outpatients with Symptoms Concerning for COVID-19

SF Health Network: Advance Planning for Outpatient Visits where Aerosol Generating Procedures NOT Needed

"COVID PPE" defined as N95 + eye protection + gown/gloves

SF Health Network: Advance Planning for Outpatient Visits where Aerosol Generating Procedures ARE Needed

Outpatient visit is planned and an AGP will be needed

Ever diagnosed with COVID-19 before?

No known prior diagnosis of COVID-19

COVID-19 diagnosis >60 days ago

COVID-19 diagnosis 31-60 days ago

COVID-19 diagnosis ≤30 days ago

Room: private, neg pressure if available
PPE: COVID PPE

Room: private, neg pressure if available
PPE: COVID PPE

Room: private, neg pressure if available
PPE: COVID PPE

Room: private, neg pressure if available
PPE: COVID PPE

Not tested in the 7d before the visit

"COVID PPE" defined as N95 + eye protection + gown/gloves

Room: private, neg pressure if available
PPE: standard needed for the AGP

Room: private, neg pressure if available
PPE: standard needed for the AGP

If 1 test was negative:
Room: private, neg pressure if available
PPE: COVID PPE

If 2 tests were negative:
Room: private, neg pressure if available
PPE: standard needed for the AGP

Room: private, neg pressure if available
PPE: standard needed for the AGP

Tested negative <7d before visit

Defer the AGP if medically appropriate. If can't defer it, refer to the below:

Tested positive <7d before visit

Room: private, neg pressure if available
PPE: COVID PPE

Room: private, neg pressure if available
PPE: COVID PPE

Room: private, neg pressure if available
PPE: COVID PPE

Room: private, neg pressure if available
PPE: COVID PPE

SF Health Network: Rooming, PPE, and Post-Discharge Room Holds for Outpatient Visits

	Patient with No Symptoms Concerning for COVID-19		PUI (symptoms of COVID-19)	COVID-19 Positive Patient	Quarantine Patient (asymptomatic but requires quarantine due to close-contact exposure)	
	Negative COVID-19 test in last 7 days	No negative COVID-19 test in last 7 days			Negative COVID-19 test in last 7 days	No negative COVID-19 test in last 7 days
<p><u>NOT</u> performing aerosol generating procedure</p> <p><i>* Performing an NP swab is <u>not</u> considered an AGP</i></p>	<p>Room: Any</p> <p>PPE: isolation mask (+ eye protection if patient [or parent/guardian in pediatrics] declining to wear mask)</p> <p>Room Hold Time: none</p>	<p>Room: Any</p> <p>PPE: isolation mask (+ eye protection if patient [or parent/guardian in pediatrics] declining to wear mask)</p> <p>Room Hold Time: none</p>	<p>Room: Private</p> <p>PPE: N95 + eye protection + gown/gloves</p> <p>Room Hold Time: 15 min.</p>	<p>Room: Private</p> <p>PPE: N95 + eye protection + gown/gloves</p> <p>Room Hold Time: 15 min.</p>	<p>Room: Any</p> <p>PPE: isolation mask (+ eye protection if patient [or parent/guardian in pediatrics] declining to wear mask)</p> <p>Room Hold Time: none</p>	<p>Room: Any</p> <p>PPE: isolation mask (+ eye protection if patient [or parent/guardian in pediatrics] declining to wear mask)</p> <p>Room Hold Time: none</p>
<p><u>Performing</u> an aerosol generating procedure</p> <p><i>Negative pressure rooms in Building 25 have higher air exchange rates, thus need shorter hold times</i></p>	<p>Room: Private (negative pressure preferred if available)</p> <p>PPE: N95 (or if sputum induction: PAPR instead of N95) + eye protection + gloves</p> <p>Room Hold Time: If AGP was not for workup of an infection: none If AGP was for workup of an infection: Non-neg pressure room: 60 min. Neg-pressure room: 30 min.</p>	<p>Room: Private (negative pressure preferred if available)</p> <p>PPE: N95 (or if sputum induction: PAPR instead of N95) + eye protection + gloves</p> <p>Room Hold Time: Non-neg pressure room: 60 min. Neg-pressure room: 30 min.</p>	<p>Room: Private (negative pressure preferred if available)</p> <p>PPE: N95 (or if sputum induction: PAPR instead of N95) + eye protection + gown/gloves</p> <p>Room Hold Time: Non-neg pressure room: 60 min. Neg-pressure room: 30 min.</p>	<p>Room: Private (negative pressure preferred if available)</p> <p>PPE: N95 (or if sputum induction: PAPR instead of N95) + eye protection + gown/gloves</p> <p>Room Hold Time: Non-neg pressure room: 60 min.
