

Dear Division members and colleagues,

Please join us in welcoming Eunice Chang to the Division of HIV/AIDS, ID and Global Medicine team where she will serve as its Division Manager as of Thursday, October 24th. Eunice was raised in St. Louis (Go Cards!) and attended the University of Illinois graduating with a B.S. in Accounting. Her desire to live abroad brought her to the United Kingdom and Switzerland where she worked at Citibank in Zurich and obtained an M.B.A. from The American College in London. A subsequent move to San Francisco gained her business development experience at internet companies prior to coming to UCSF. Research administration roles in the Department of Medicine (Hematology/Oncology, Occupational Medicine/ZSFG) and Orthopaedic Surgery led her to join Research Management Services at its inception. Eunice continued to develop her leadership and management skills working with faculty in the Department of Medicine, Osher Center for Integrative Medicine and UCSF Fresno.

Eunice enjoys time with family and friends exploring San Francisco, piano, film, comedy shows, calligraphy, and travel to new destinations.

She looks forward to returning to the Department of Medicine and ZSFG in this new role to expand her strong interest in community health and be a part of the mission to reduce and eliminate infectious diseases locally and worldwide.

We are excited about Eunice joining the division and look forward to supporting her in her wise stewardship of its resources to work towards our many ambitious goals. We all wish Eunice a warm welcome in her new role!

Thank you,  
Diane and Laurae
